

# Suranjana Sarkar

## DATA & Business ANALYST

(+33) 748373005 | [suranjanas360@gmail.com](mailto:suranjanas360@gmail.com) | Paris, France | [LinkedIn](#) | [Portfolio](#)

### PROFESSIONAL SUMMARY

Data and analytics professional with 4+ years of total experience across software engineering, data quality, BI, and analytics workflows. Skilled in Python, SQL, Power BI, data quality validation, GDPR, and cloud-based ETL/ELT concepts. Hands-on experience with large datasets, schema checks, YAML-based validation rules, KPI reporting, Git-based collaboration, CI/CD concepts, and agile delivery.

### CORE COMPETENCIES

**Programming:** Python, SQL, Machine Learning, Artificial intelligence, Machine Learning, REST API with API testing and debugging

**Data Governance & Quality:** Data Quality validation rules (YAML), Schema checks, Data quality monitoring, GDPR

**BI & Reporting:** Power BI (DAX, Data Modeling), Advanced Excel, Data manipulation and visualization

**Data Engineering:** ETL/ELT concepts, Spark, dbt, CI/CD concepts

**Tools & Platforms:** Azure Databricks, Airflow, Git, JIRA, Agile & Scrum

**SOFT SKILLS:** Problem-Solving, Communication, Active Learner, Adaptability, Decision making, Team Player, Adaptability

### PROFESSIONAL EXPERIENCE

#### Intern – Data & BI Project Leader | Air Liquide France

Paris, France | 11/2025 – 03/2026

- Developed a complex and executive Power BI dashboard for the Group Industrial Direction team by building and monitoring 20+ KPIs to provide clear visibility into industrial performance, identifying contributors and outlier sites, products, facilities etc.
- Built a semantic text analysis model for cross-database table matching to support table mapping and foreign key identification.
- Designing data quality dashboards to show overall data health and critical issues to analyze problems and fix them

#### Intern – Data Quality Engineer | HILTI France

Paris, France | 05/2025 – 10/2025

- Collaborating with Hilti's Digital Marketing team to develop a Technical Data Product (TDP) focused on Data quality, GDPR compliance, and data governance to improve customer experience.
- Designing and implementing YAML-based data validation rules to automate data quality checks and enforce schema validation.
- Implementing data quality checks and optimizing dynamic queries in AWS Athena to analyze large datasets and identify missing or mismatched records, while collaborating with senior Data Engineers to manage Airflow DAGs for automated data pipelines.

#### Senior Software Analyst | Capgemini India

Kolkata, India | 08/2021 – 08/2024

- Partnered with business and technical stakeholders to validate requirements, analyze issues, and improve acceptance criteria, reducing release risk and improving production stability while validating critical workflows with stakeholders.
- Strengthened expertise in Agile methodologies through hands-on contributions to problem-solving, business analysis, quality assurance, and process standardization, ensuring consistent and high-quality delivery of client-driven analytics solutions.

### EDUCATION

#### MSc in Data Analytics for Business (2024-2026)

KEDGE Business School, Bordeaux, France

**Courses:** Machine Learning, Artificial Intelligence, GDPR, Change management, Business analysis, DBMS, Data Visualisation, Agile

**Winner:** L'Oréal AWS AI Hackathon (March 2025): Created a business solution using AWS, ML, LLM and Basic Prompt Engineering.

**Certificate :** [Microsoft Certified: Azure AI Fundamentals](#) [January 31, 2025] , [Professional Scrum Master](#) [December 17, 2024]

**Masters' Thesis:** Sentiment Analysis of Customer Reviews Using Natural Language Processing – BERT

#### B. Tech in Electronics Engineering [ECE] (2017-2021)

University of Engineering and Management, Kolkata, India

**Project:** Image caption generator using CNN and LSTM neural networks.

### LANGUAGE

**English:** Native like Proficiency (C2) | **French:** intermediate (A2.1) | **Bengali:** Mother tongue
